

ESOLPK – EDUCATION SECTOR EXPERIENCE

E: info@esolpk.com

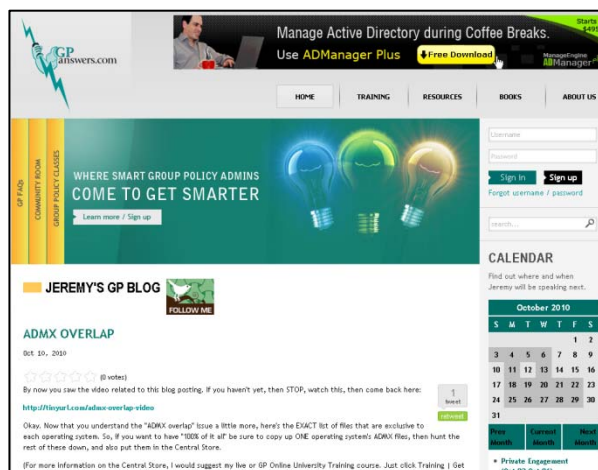

W: www.esolpk.com

Web and software automation solutions for Education Industry are beneficial for both students and the educational professionals. ESOLPK solutions for this specific domain have been specifically designed to suit the requirements of various institutes in Educational sector. We can help you build integrated learning solutions and customized education products.

Our integrated solutions portfolio, and experience working with leading Educational organizations, can help transform your learning and teaching experience from ordinary to inspirational and helpful. Our focus in Educational Industry ranges from Student Portals, Class Management Systems, e-Learning Solutions, Educational Assessment Reports and Solutions, Adaptive Learning, University Management System and Student Information System as well as their integration with Enterprise Applications and Content Management Solutions. We also customize the Microsoft Dynamics range of products specified for the Educational industry.

Below are some of our highlighted projects.

GPanswers.com

GPanswers.com refers to Group Policy Community – a community dedicated to online training. Most companies spend a fortune in planning and migrating to Active Directory. Then once they have Active Directory in place, the next logical question is "What do we do with it?"

Group Policy is what you do with Active Directory - you control and manage your clients and servers with the nearly limitless power it offers.

The client offers several training classes to choose from including public, private, and sponsored classes. These classes are taught by Group Policy MVP and expert instructor.

They had approached ESOLPK to setup their website in Joomla and include various features in this website like Calendar, Videos and webinar components. ESOLPK arranged a team of members under the supervision of Senior Technical Lead to work on the project. Provided resources developed and maintained the website on on-going basis.

Trinity College School

Trinity College School is a co-educational, independent boarding/day school located on 100 acres of rolling countryside in picturesque Port Hope, Ontario, Canada, one hour's drive east of Toronto. Established in 1865, TCS is one of Canada's oldest and most respected educational institutions. The School places a balanced emphasis on academics, service learning, athletics and the arts.

ESOLPK has provided Trinity College School extensive IT services for their website development. We provided them outsourcing services for on-going maintenance of website as well.

Amcolians Alumni Association: Army Medical College

This project was the creation of e-Balloting for AMC Alumni and redesign of their website. The e-Balloting solution had features like Member Listing, Registration/login, Online submission of application for nominees, display of personal profiles with check boxes, password protected mechanism to cast vote and ability to verify the vote with confidentiality.

Moreover, features like list display of members who voted and who did not vote, automatic counting of votes and fee submission mechanism for members was also a part of this system. The second requirement was the redesign of existing website. This website was deployed in PHP / MySQL technologies.

PolicyPak.com

Moskowitz, Inc. helps overworked IT administrators maintain control of their users' computers with desktop management software (PolicyPal) on their desktops and laptops. PolicyPak helps quickly put a software lock down on applications and ensure that users' settings are set, unchangable, and are always there.

PolicyPak Application Security Manager ensures that IT and corporate directives are adhered to by users. Use desktop compliance standards to get a simpler, safer and more secure computing environment. They approached ESOLPK for IT services on their website and application. We provided services on on-going basis to Moskowitz, Inc.

eSurgery: eLearning Web Application System

eSurgery is an innovative new eLearning Web Application System that has been designed exclusively for the Medical Students, Doctors, Medical Researchers, Head of the departments etc. eSurgery allows students to view videos- on-demand of surgical operations, techniques and tutorials along with simultaneous scrolling documentation, step by step procedure guides and interactive diagrams helping to describe the surgical procedures. As eSurgery is internet based, students may also access a set of comprehensive online links to relevant journal articles, surgeon's tips and tricks, discussion rooms and chat areas while viewing videos and tutorials.

BentoSnap - Class Management System

The client required a website to help display their class details and provide an easy way for their students to sign up for them. Their instructors also needed an easy way to communicate with students enrolled in their classes. Some small local businesses were available for clients that provide training classes but there was no easy way to manage them.

ESOLPK provided a complete solution in form of website to showcase and manage training classes for these businesses. The first clients on the site are "The Marin Photo Group" and "Seawood Photo", who will provide photography training classes for their customers. There are 5 types of users on the website. Each level of user can administer the level below it (with the exception of Student).

- Unregistered visitor
- Student
- Instructor
- Company
- Super administrator
