

PHARMA /SOFT 2009

**A TOTAL SOFTWARE
SOLUTION FOR A CHEMIST SHOP**

ESOLPK
WE TAKE IT FURTHER...

PharmaSoft

PharmaSoft is an ultimate solution for retail pharmacy outlets, which can reduce the cost and save time by embedding paper-less environment in a Healthcare Business. The project is a desktop application and has been developed while seeing the growing needs for pharmacies and chemist shops spread across the country as well as internationally.

This is an accounts, inventory and point-of-sale system. This software completely automates the day-to-day operations like Accounts, Inventory, Sales and Purchases in a Healthcare Business.

By using this system, the entire manual accounting processes can be done automatically. It also tracks records of expiry of the medicines and work like a decision support system (DSS), because on the basis of the records, sales of different quarter of years can be recorded and analyzed to take important decisions related to business.

This application was developed in VB.NET and SQL Server.
