United States Employees Association (American Club) Financials, HR & Payroll and Retail Management System

The United States Employees Association is a prestigious Club that caters the foreigners/diplomatic community in the federal capital and in all major cities of Pakistan.

USEA was facing serious problems in managing financials, Assets management, human resource management, Supply Chain management and Member Information management. The USEA administration was not getting optimized and clear picture for works detail in progress, budgeted expenditures, contracted expenditure, scheduled date of expenditure and the committed financial amount report that may help USEA administration and top management in efficient decision. For this purpose, they approached various solution providers of SAP, Oracle Financial and Microsoft Great Plains in Pakistan.

After undergoing an extremely competitive selection process, ESOLPK GROUP has been selected to do this automation project on the Microsoft Great Plains platform and technology. ESOLPK has been awarded this contract for IT solutions and services for American Club on the basis of its past excellent track record and history of 10 years.

The solution, that we have proposed, can manage USEA routine tasks smoothly. In addition, our proposed system can generate extensive reporting that may roll fast USEA administration and top management decisions in an efficient and realistic way using MS Dynamics Solutions, MS Retail Management System and Hotel Management System.

The solution by ESOLPK includes supply/ implementation of Financials, HR & Payroll and Retail Management System of at 7 locations in Pakistan. This will facilitate USEA administration in efficient handling of Member Information Management System, Financials, Asset management, Supply Management System, Human Resources and Payroll. The Microsoft Dynamics solution embedded with extensive and efficient reporting system will deliver reports to USEA top management regarding Asset management, Cash Management, Supply Chain, Human Resources and Payroll.

Enterprise Level Application for Pakistan Army Management Information System Solutions

Pakistan Army is the largest branch of the Pakistan Military, and is responsible for protection of the state borders, the security of administered territories and defending the national interests of Pakistan within the framework of its international obligations.

ESOLPK has been a proud service provider to Pakistan Army. We have developed an Enterprise Level application for an organization of Pakistan Army namely CAO (Chief Administrative Office) Directorate. This organization has a size of over 5000 employees and they required a comprehensive office automation system. We developed this huge application using ASP.NET and Oracle 9i.

A team consisting of 15 members worked exclusively on this project for a year. A total of 17 modules along with different network and hardware solutions were developed and deployed which includes document tracking system, Office correspondence, HR, payroll, finance and budgeting, personnel management system, decision control panel, inventory, management system, land and engineering System, accommodation system, military transport system, workshop system and mess system.

MHA (Massachusetts Hospital Association) Online Compensation Survey Application

Massachusetts Hospital Association (MHA) is a voluntary, not-for-profit organization comprised of hospitals and health systems, related organizations, and other members with a common interest in promoting the health of the people of the Commonwealth. MHA's status as the primary representative of the Commonwealth's hospital and health system community allows the organization to serve as a clearinghouse for strategic information and perspective on the healthcare environment in Massachusetts and beyond. The goal of MHA's information services is to arm its membership with the tools they need to support leadership decisions and to understand and manage current, complex, or controversial issues. At this point about 114 hospitals from Massachusetts are partner with MHA.

We, at ESOLPK, are the proud backend IT service provider to MHA. The entire survey application system which is the cornerstone of MHA is developed and supported by ESOLPK. Data from 114 hospitals is collected to a centralized point and on this data, through a complex algorithm; a decision support system is developed. A team of dedicated professionals with varying responsibilities is working with MHA.

Dr-SIR

Efficiency Measurement toolkit for Healthcare

Dr-SIR is a research based product which has been developed in to an "expert computer software system" to be utilized in hospital setups and other healthcare delivery systems. This research product has been developed on the basis of a research study conducted in major teaching and general hospitals. A total of 104 professors and senior specialists (who had specialized in various fields of medicine, surgery and diagnostics) from USA, UK, Japan and EU placed at leadership and supervisory positions were involved in benchmarking.

Dr-SIR evaluates over 3500 work flow activities that can exist in a hospital system. It can analyze work flow efficiency on a macro (system wide) and micro (physician, nurse or technician, working individually or in group/team). It generates a myriad of analysis and optimal work flow models via reports that you can access via the Internet in a menu format. Dr-SIR's standard measures (Work Units) and benchmarking are recognized as most aligned with the 2008 Health and Human Resource (AHRQ) study on measuring hospital efficiency. Dr-SIR has been honored to serve on The Leapfrog Group's board of advisers.

Dr-SIR system is owned, developed and designed by ESOLPK.

JICA (Japan International Cooperation Agency)

District Health Information System

Japan International Cooperation Agency (JICA) is an independent governmental agency that coordinates official development assistance (ODA) for the government of Japan. It was established on August 1974, when it took over the functions of the Overseas Technical Cooperation Agency (OCTA), the Asia Association and some other organizations. These predecessor agencies were responsible for Japan's international cooperation.

ESOLPK is proud to provide IT services to JICA. We have provided a team for development work on the District Health Information System Project. The main development feature will include Evidence-Based Decision-Making and Management. ESOLPK provided a comprehensive team under the guidance of project manager and team lead to JICA to work on on-going basis on their project.
